

# Condo sales help set new record for August unit sales

**OTTAWA, Sept. 6, 2017** - Members of the Ottawa Real Estate Board sold 1,538 residential properties in August through the Board's Multiple Listing Service® System, compared with 1,481 in August 2016, an increase of 3.8 per cent. The five-year average for August sales is 1,343.

"Condo sales continue to strengthen the Ottawa resale market," says Rick Eisert, President of the Ottawa Real Estate Board. "These numbers also assisted in setting a new record for the number of units sold in August, pushing August 2016 unit sales into second-place. In comparison to last year the number of condo units sold was up 22.1 per cent, whereas residential units have held steady with a less than one per cent decrease over this time last year. We are actually seeing very similar numbers to that of July 2017."

August's sales included 359 in the condominium property class, and 1,179 in the residential property class. "The number of new listings and inventory levels for the month of August continued their steady downwards trend compared to last year," explains Eisert. "However, prices continue to remain relatively

steady, especially in comparison to other markets in Canada. Over the past several years, Ottawa has been more or less on par with inflation rates."

"While REALTORS® have reported fewer multiple offer situations in the past month, we are seeing Sellers receive asking price or very close to it," says Eisert. "Cumulative days on market have tightened significantly since last year. Residential listings are selling

The average sale price of a residential-class property sold in August in the Ottawa area was \$420,335, an increase of 7.6 per cent over August 2016. The average sale price for a condominium-class property was \$270,768, a decrease of 0.4 per cent over August 2016. The Board cautions that the average sale price can be useful in establishing trends over time but should not be used as an indicator that specific properties have increased or decreased in value.

The calculation of the average sale price is based on the total dollar volume of all properties sold. Price and conditions will vary from neighbourhood to neighbourhood.

"The two most active price points in the residential market continue to be the \$300,000 to \$399,999 followed by the \$400,000 to \$499,999 range, combined accounting for 55.6 per cent of the market. Within the condo market, the most active

price point was between \$150,000 and \$249,999, accounting for 49.5 per cent of the market," says Eisert. "In addition to residential and condominium sales, OREB Members assisted clients with renting 2,153 properties since the beginning of the year."

almost 30 per cent faster than this time last year, and condo units are selling just over 10 per cent faster than last year. Although, keep in mind that while some areas within the Ottawa market are quite active, other areas of the city remain less active."
